

Aleksejs Buss

AI ENGINEER • MULTI-AGENT SYSTEMS

*Creator of Orchestra — open-source Mixture-of-Agents platform.
Eight production systems. Shipped solo.*

EMAIL *aleksbuss@gmail.com*

GITHUB *github.com/aleksbuss*

WEB *aleksejs-portfolio.pages.dev*

LOCATION *Hof / Saale, DE • EU citizen*

STATUS *Available immediately • remote or on-site*

§ 01 Summary — *at a glance*

AI engineer specialising in *multi-agent LLM systems*. Creator of **Orchestra** — an open-source Mixture-of-Agents workspace (TypeScript / Next.js 15) with **2,602 tests and 74 documented post-mortems**; parallel expert agents, a code-guaranteed Skeptic, embedding-based disagreement detection. Since mid-2025 I have shipped **eight production AI systems** serving real users — Cloudflare Workers edge, Telegram Mini-Apps, multi-provider LLM pipelines, payments, security. Features from spec to live infrastructure, end to end — founder-grade ownership at one headcount.

§ 02 Selected work — *production systems*

05/2026 — now

FLAGSHIP · OSS

Orchestra — *Multi-Agent AI Workspace*

Mixture-of-Agents pipeline · code-guaranteed Skeptic · live cost telemetry.

Self-hosted AI workspace running 3–5 specialised expert agents in parallel on every substantive turn. Router with dynamic persona generation; a Skeptic guaranteed by code, not by prompt; embedding-based disagreement detection that surfaces expert conflict instead of smoothing it away; reflection critic + revisor pass. Live per-chat token + USD cost banner. BYOK or fully local via Ollama. 2,602 tests, 74 documented post-mortems, CI — MIT-licensed.

Router (DPG) → proposers || Skeptic → disagreement detector → Aggregator → reflection

PRODUCTION

AI Dictaphone *v7.0*

Edge voice pipeline · Whisper → LLM · sub-second latency.

Serverless voice-to-insight pipeline on Cloudflare edge. Voice note → Groq Whisper transcription → LLaMA 3.3 70B summarization → rich Mini-App UI. Zero cold-start, HMAC-verified webhooks, no persistent storage of voice content.

Telegram Mini-App → Cloudflare Workers → Groq Whisper+LLaMA 3.3 70B

Stack: Cloudflare Workers · Groq Whisper-large-v3 · LLaMA 3.3 70B · JS ESM

09/2025 — now

AI Moderation *Bot*

n8n workflow · dual-AI failover · auto-escalation.

15+ node n8n pipeline classifies every Telegram message with structured JSON outputs, routes to action, escalates sanctions across three tiers. Dual-provider failover (Nemotron primary, GPT-4.1 fallback) keeps moderation alive when any single LLM API is down.

Message → Nemotron → fallback GPT-4.1 → Router → action

Stack: n8n · OpenRouter · GPT-4.1-mini · Nemotron · Telegram Bot API

10/2025 — now

SAAS PRODUCT

AI Psychology *Bot*

Full SaaS · payments · crisis support · CBT exercises.

End-to-end SaaS solo: HMAC-SHA256 auth → distributed Apps Script backend → Firebase Realtime DB → Gemini 2.5 + TTS pipeline. Telegram Stars for native checkout, atomic credit operations, referral program, panic intervention, 7-Skill protocol.

Mini-App → HMAC-SHA256 → Apps Script → Firebase → Gemini+TTS

Stack: Gemini 2.5 · Telegram Stars · Firebase RTDB · Apps Script · HMAC-SHA256

02/2025 — now

BUSHMARK.CC

Bushmark — *Secure Clipboard*

Self-hosted · cookie auth · one-click install.

Self-hosted secure clipboard at bushmark.cc — three persistent slots, 24h history, auto-rotation, Tailwind UI. One-line bash install on any Ubuntu VPS handles Nginx + FastAPI + systemd setup automatically.

Browser → Nginx reverse proxy → FastAPI (systemd)

bushmark.cc → Stack: FastAPI · Nginx · systemd · Tailwind · Ubuntu 24.04

11/2025 — now

SELF-HOSTED

CyberDed Ultra + *ComfyUI*

Local AI infra · one-click installer · Android + Linux.

Bash installer for the entire local-AI stack: Ollama for inference, ComfyUI for image generation, NVIDIA Container Toolkit auto-config, Flask backend with Server-Sent Events streaming chat, real-time monitoring. Two OS targets — Linux + Termux Android.

Bash installer → Ollama+ComfyUI Docker → Flask SSE

github.com/aleksbuss → Stack: Docker · Ollama · Flask · ComfyUI · NVIDIA Container Toolkit

01/2026 – now

OPEN SOURCE

Termux *AI Dictaphone*

Android as offline AI server · zero cloud cost.

Complete offline AI on any modern Android: Whisper transcription via faster-whisper / whisper.cpp, LLaMA / Gemma inference via Ollama, all on-device through Termux. Zero API cost, full privacy. Published OSS.

Termux (Android) → faster-whisper → Ollama (LLaMA, Gemma)

github.com/aleksbuss → Stack: Termux · faster-whisper · whisper.cpp · Ollama · Python

AI Engineer · Solo Production

Independent · Hof / Saale, DE

- Designed, deployed, and operate eight production AI systems end-to-end — own architecture, own code, own infrastructure.
 - Built Orchestra, an open-source multi-agent AI workspace (TypeScript/Next.js 15): MoA pipeline with parallel expert proposers, code-guaranteed Skeptic, embedding-based disagreement detection — 2,602 tests, 74 post-mortems, CI.
 - Multi-provider LLM pipelines (OpenAI, Gemini, Groq, Ollama) with failover; structured outputs; voice + vision flows.
 - Edge serverless on Cloudflare Workers; Telegram Mini-App + Bot integration with HMAC-SHA256 webhook verification.
 - Self-hosted infra: Ubuntu VPS, Nginx, systemd, Docker, Tailscale, NVIDIA Container Toolkit.
 - Monetization: Telegram Stars payments, atomic credit ops, referral logic, anti-fraud heuristics.
-

2023 — 2025

Self-directed study · AI & Automation

Independent

- n8n agent workflows; prompt engineering; structured outputs; chain-of-thought architectures.
 - Local LLM deployment (Ollama, llama.cpp, faster-whisper); Docker Compose; SSE streaming.
 - Cloudflare Workers, Apps Script, Firebase, FastAPI, systemd, edge-first architectures.
 - Worked logistics part-time to fund deep evening / weekend study.
-

10/2022 — 10/2023

Frontend Developer (retraining)

Tel-Ran Berlin · 960h · DEKRA-certified

- JavaScript Advanced (ESM, async, prototypes); React fundamentals; DSA; HTML5/CSS3.
 - DevOps essentials (Git/GitHub, CI fundamentals, Docker basics); QA; UI/UX foundations.
 - Career switch from logistics into software engineering.
-

2008 – 2022

Logistics & Long-Haul Freight

Tesco Carlisle (UK) • multinational freight, UK & Europe

- 14 years operating in multicultural teams across UK, DE, NL, FR, BE.
- Warehouse management systems (WMS), planograms, route planning, just-in-time delivery.
- Process discipline and resilience under deadline pressure — the skill that transfers.

Agent Systems

Mixture-of-Agents (MoA) orchestration · dynamic persona generation · embedding-based disagreement detection · reflection loops (Generator-Critic-Revisor) · cost telemetry · agent tool design · sandbox & SSRF guards

AI / LLM

OpenAI GPT-4 / 4.1 / TTS · Google Gemini 2.5 · Groq Whisper-large-v3 · Ollama (LLaMA, Gemma) · faster-whisper · whisper.cpp · OpenRouter · Nemotron · multi-provider failover · structured outputs · prompt engineering · RAG-ready patterns

Automation

n8n · workflows · agents · code nodes (JS/Python) · webhook routing · error handling & retries · chain-of-thought architecture · multi-protocol agents

Languages

TypeScript (strict) · Next.js 15 / React · JavaScript (ESM, async) · Python (FastAPI, Flask) · Bash · HTML5 · CSS3 · SQL · streaming APIs (SSE)

Cloud / Edge

Cloudflare Workers · Wrangler · Google Apps Script · Firebase Realtime DB · GitHub Pages · Supabase / PostgreSQL

Operations

Docker / Compose · Nginx (reverse proxy, TLS) · Ubuntu VPS · systemd (services, timers) · health checks · auto-restart · log rotation · NVIDIA Container Toolkit · Tailscale

Security

HMAC-SHA256 · JWT · Telegram Bot API · Telegram Mini-Apps SDK · Telegram Stars payments · CSP · CORS · webhook verification · rate limiting · secret management · anti-fraud logic

Tooling

Git / GitHub · GitHub Actions CI · Vite · Vitest · Playwright · ESLint · Wrangler · macOS / Linux daily driver
